

Website Example - Brookside ICF

This document provides a visual snapshot of what this website looked like when I designed it. It may have been changed or redesigned since then.

Desktop - Homepage

What is ICF?

ICF is an insulated concrete form made up of type 2, closed-cell expanded polystyrene, with polypropylene web supports on the inside. This stay-in-place forming system offers a unique structural system for building your home, shop or cottage. Providing you with the option of R22 or R30 insulation value, you can be sure to meet building code requirements. The built-in vapour, air and sound barriers are an added bonus, and the ability to directly attach your exterior and interior finishes saves you valuable time. If you are interested in learning more about the products we use and trust, click below to check out the Amvic website.
